SUMMARY

Motivated PHP Developer with strong experience in Laravel and raw PHP/MySQL systems. Co-founder of Eduvalu, an online platform serving over 60,000 students. Skilled in backend development, scalable systems, and technical team leadership. Currently building advanced freelance educational center systems to deepen backend skills. Seeking roles focused on PHP, Laravel, and backend engineering.

EDUCATION

SADAT ACADEMY for MANAGEMENT SCIENCES

Bachelor of Computer Science, Undergraduate Student

Maadi, Egypt

2024 – 2028

EXPERIENCE

Eduvalu (Educational Platform)

Feb 2024 – Present

Co-Founder & Project Manager

- Co-founded Eduvalu and led development from concept to production within 4 months.
- Supervised developers and managed 350+ features/fixes delivered under Rascoda.
- Maintained platform growth to 60,000+ students, 1,000 courses, and 40 teachers.

Rascoda / Eduvalu

Feb 2024 – Present

Backend Developer (Laravel)

- Restructured the backend using Laravel to build scalable, modular components.
- Built full accounting and reporting systems integrated with the platform.
- Created external admin/teacher tools using raw PHP and MySQL.

Freelance Project

Oct 2023 – Nov 2023

Frontend Developer (PugJS, Sass)

- Developed a responsive website for a marketing agency from scratch.
- Delivered polished, client-ready UI and earned first freelance income.

ONGOING PROJECTS

Eduvalu Backend Refactor | *Laravel, PHP, MySQL*

Feb 2024 – Jan 2025

- Modularized backend architecture for maintainability and performance.
- Added reporting, payment, and notification modules.
- Built REST APIs to support admin and teacher dashboards.

Eduvalu Supervisor Panel | *PHP, MySQL, Bootstrap*

Apr 2024 – Mar 2025

- Created a dashboard for supervisors to track attendance and grades.
- Implemented filters, role-based access, and advanced search features.

Educational Center Management Systems | *PHP, MySQL, Eduvalu-linked*

May 2025 – Present

- Freelance PHP Developer building two custom systems linked to Eduvalu.
- Developed a reservation system for New Year student appointments across centers/teachers.
- Built a center admin system to manage branches, halls (capacity), lectures, and students.
- Implemented lecture template logic for recurring sessions (e.g., weekly physics class).
- Stage one complete: center structure, subject/professor assignments, Eduvalu student integration.
- Stage two in progress: professional attendance tracking logic.
